That's it. Player may take up to 30 seconds to play music.

Your business is unique, and sometimes setups can be too.
Please visit CustomChannels.net/setup if you:

- Can't get your player to connect to the Internet or play music
- Only have one audio cable to your amplifier (mono connection, not stereo)
- Need advanced networking info (i.e. ports used, firewall setting, etc.)
- Have a different equipment setup than described in this guide

How to change channels:

CHANNEL PRESETS 1-5

CHANNEL UP-DOWN
